

# REGIONAL HAZE PLANNING READINESS 2018 ASSESSMENT SURVEY

WRAP RHPWG Meeting - October 2, 2018

Julia Lester, Ramboll

# SURVEY BACKGROUND

- WRAP continues to assist states as they develop Regional Haze SIP elements and offer assistance where states request it (SIP revisions due in 2021)
- The next step is a survey of states' recent efforts, including topics such as:
  - Monitoring data and tracking metrics
  - Emissions inventory development
  - Identifying sources for control analysis and conducting four-factor analyses
  - Developing/Implementing control measures and regulations
  - Consultation and Outreach
- By design, some of the survey questions might overlap with those on previous surveys
  - If you have answered a similar survey question in the past, please summarize any recent developments

# SURVEY TRANSMITTAL

- The email sent by Emily Weissinger of Ramboll on 9/28 contains the following documents:
  1. Survey Introduction: Provides background on Regional Haze planning and the purpose of the survey, as well as important contact information
  2. Survey Questions
  3. Calendar of Availability for Follow-up Calls: Per request, Ramboll will be available for one-on-one calls with states to answer questions or provide feedback on draft responses to survey questions
- Emails were sent to personnel listed on the the Key Regional Haze SIP Contacts list. ***If your contact has changed, please notify Tom Moore as soon as possible***
- To complete the survey, please read each question and add your responses using Microsoft Word "track-changes" or simply in another font color.
- While working on your responses, it may be helpful to review any of your state's previous regional haze planning documents, such as previous SIPs and progress reports.

# TIMELINE

- September 28 – Survey transmitted via email
- October 2 – WRAP RHPWG Meeting and Ramboll Introduction
- October 8-19 – Window for one-on-one calls with Ramboll
- October 22 – Survey due date
- November – Survey findings released in draft synthesis report
- December – Synthesis report finalized
