

Save the date! The Shared Database Subcommittee of the Regional Haze Planning Work Group will present a progress report and preview of the new version of the Technical Support System (TSS v2) on Friday October 5, 2018 from 1:00 pm to 2:30 pm MDT.

Anyone, anywhere, in any way involved with Regional Haze (Visibility Protection) planning and regional air quality analysis will not want to miss this informative presentation. Planning for visibility protection can be overwhelming; the goal of the TSS v2 is to be your “one-stop shop” for planning.

During the presentation, we will address the following questions:

- Why are there different databases? What do they have in common?
- What is the TSS?
- How do we get there? How do we use it?
- What tools have been developed so far?
- What’s the plan for the future?
- What’s the best way to be kept in the loop?

Please join us Friday, October 5th at 1:00 pm MDT by following both instructions below.

1. Dial in (U.S. & Canada): 800-768-2983
