

Western Modeling Workshop
EPA/WRAP-up

Thursday July 11th Closing Session

Gail, Kirk, and Tom

Workshop Action Items & Projects

- Write a summary key findings and research needs (update of doc from 2011 workshop).
- Which new work groups are needed?
 - Wild fire emissions (Tom)
 - Ad Hoc workshop / calls on Cold Pool modeling (Kirk/Gail)
 - O&G projections / base year data improvements (Tom/Theresa/Julie)
 - Ozone SI workgroup to continue - successful
- Identify needs for additional monitoring and field studies.
- Oil & Gas Issues
 - Basin and national EIs – down to field / formation / reservoir decline
 - Speciation data - clearinghouse
 - Motor vehicles associated with O&G production
 - More measurements summer and winter
 - Observational to Emissions estimates matching – to better Emission Factors
 - Control Analysis – costs of permitting and regulatory compliance – how to incentivize better emissions estimates – process level simulation software for understanding –
 - Facility emissions and operational performance – distribution of emissions and statistical properties - explore state-regional-other orgs involvement in ACAST Tiger Teams' projects
- Format(s) for meetings
 - NSF (Jana Milford) October 21-22
 - Phone//webinar:
 - ACAST research meetings
 - Ad Hoc workshops like Vernal, regional meetings, et cetera
 - 2015 Western Modeling Workshop

Thanks very much to in-person and remote presenters and participants.

You made the workshop, work, in terms of quality and content.

See or hear you at the next workshop in 2015 when together we will have made progress on western air quality
