

**New Mexico Air Quality Workshop**  
**Wednesday, December 18**  
**9 a.m.-3:30 p.m.**

**BLM New Mexico State Office**  
**Canadian River Conference Room**  
**301 Dinosaur Trail, Santa Fe, NM**

NMED

BLM

Want to learn more about how air emissions source categories and other states' air emissions affect New Mexico's air quality? Want to know how New Mexico's air emissions affect other states? Don't miss this opportunity to learn more about ozone and particulate matter concentrations in New Mexico and the West.

Tom Moore, Air Quality Program Manager for the Western Regional Air Partnership, will present a one-day workshop covering two collaborative air quality studies in the West that will provide information for western air quality planning in the future. Learn about these studies, what the results show, what the data can be used for and how these studies can help New Mexico and other western states assess air quality.

### Agenda

**9-11:30 a.m. West-wide Jumpstart Air Quality Modeling Study**

**1-3:30 p.m. Three-States Data Warehouse and Air Quality Study**

Please e-mail Mary Uhl ([muhl@blm.gov](mailto:muhl@blm.gov)) or Rita Bates ([Rita.Bates@state.nm.us](mailto:Rita.Bates@state.nm.us)) if you plan to attend so we can ensure adequate seating. Remote access to the workshop will be available by phone, if requested.
