

**WRAP Oil and Gas Work Group  
November 15, 2016 Conference Call  
11:30 am – 1:00 pm Mountain  
Phone 800-768-2983 access code 4918837**

The Western Regional Air Partnership (WRAP) Oil and Gas Work Group (OGWG) will have its first conference call on Tuesday, November 15, 2016. The call will focus on formation of the Work Group as well as to begin to develop a 2017 Annual OGWG Workplan.

❖ Welcome & Introductions (Melissa)

14 attendees on call:

Tom Moore – WRAP AQ Program Mgr.  
Minnie Grant – Ute Tribe (co-chair)  
Darla Potter – Wyoming DEQ (co-chair)  
Melissa Hovey – BLM (co-chair)  
Whitney Oswald – Utah DEQ  
Adam Rookey – North Dakota DH  
Eileen Steilman – Montana DEQ  
Dave Aquirre – Montana DEQ  
Dale Wells – Colorado DPHE  
Joe Fischer – California ARB  
Amanda Brimmer – Denver RAQC  
Terry Svalberg – FS  
Jenny Newton – FS  
Jennifer Snyder - EPA

A general description of the purpose and intent for forming this group was described as: a collaborative effort to identify ongoing and proposed projects that would inform western agencies' management of oil and gas development related monitoring, modeling, emissions, and policy decisions.

❖ WRAP Overview (Tom)

➤ Approach to 2017 Workplan – Deliverables, Funding Sources, Budget

Tom provided a brief history of WRAP and its mission in the western region of US. He discussed WRAP Board and Technical Steering Committee (TSC) and that the formation of an Oil and Gas workgroup was identified in WRAP's 2016 workplan.

❖ Oil and Gas Work Group Overview (Minnie)

Briefly discussed the suggested make-up of the working group: approx.. 10-12 "members" from Tribal, local, state, and federal agencies that are members of the WRAP. Would serve a 2 year term and members would be approved by the TSC. Additional participants from member agencies or other agencies, academia, etc. would be involved as "resource advisors" on an as needed basis.

➤ Relevant projects underway (Tom)

Tom described 5 current ongoing projects that are relevant to the work this group may do:

1. Emissions inventory for O&G activities in New Mexico in San Juan/Permian basins for 2014 and projected future year.
2. National Oil and Gas Emissions data team – this group advises EPA on developing the emissions for this sector in the National Emissions Inventory (NEI).
3. 1-hour NO<sub>2</sub> emissions from Drill Rigs Study – being conducted through WRAP, funded by BLM and API.
4. 2014 NEI Point Source Data Analysis for O&G sector – using EPA tool, analyzing the quality and completeness of emissions data, particularly with regards to GHG reporting.
5. IWDW – Intermountain West Data Warehouse – 4 state, multi-agency effort for regional modeling, monitoring, and emissions related to O&G development.

❖ Strawman Draft Workplan (Darla)

Darla presented the draft strawman workplan for the working group. WRAP would like us to submit a 2017 workplan in Jan. Darla described the group structure and integration with other WRAP and WESTAR teams. She described the 8 action items for the workplan identified to date. The workplan is a dynamic document and this draft is just intended to help us focus and get started. Co-chairs are looking for feedback on what items should be revised, deleted, added and what items resonate with each agencies priorities for 2017. In addition to working on emissions data for regional haze SIPs, what other priorities could this group take on, related to O&G development, that would resonate with your agency's 2017 priorities.

- Elements to keep, discard, add
- Elements to achieve in 2017

❖ Next Steps & Schedule Next Call (Melissa)

**ACTION ITEMS**

1. Review and comment on Action Items I through VII in the draft strawman work plan.
2. Send comments to co-chairs by COB Mon. 12/5/2016
3. Determine who from your agency will be the OGWG member
4. Provide days/times that you are not available for monthly call to co-chairs
5. Provide suggestions to co-chairs for Tribal members and other resource advisors
6. Respond to “doodle poll” for next call (tentatively week of 12/12)

**GOALS of NEXT CALL**

1. Solidify “members” and suggest “resource advisors”
2. Establish day and time for standing monthly call
3. Review 2<sup>nd</sup> draft of workplan
