

Tribal Data Work Group call – 1/16/20

Summary of current/new action items – notes by E.R.

1. Mehrdad – ITEP/EN3 deliverables SOW. 2 tasks, thru Dec 2020. 1: ITEP can review states' SIPs for tribes. Open-ended. 2: Contact list maintenance etc.
Bill- 2019 contract is done so need extension to continue any work. M- extension/amendment of the 2019 contract.

Tom- depends on budget available. None decided yet. Old contract is extended for 3 or 6 months but can be modified. Current funds are all committed. Wants to collect/define tasks that can be ongoing from tribes/TDWG. E.g. maybe an EPA grant for training etc. Don't yet know any amounts.

T& M – will process amendment. Use remaining funds to finalize last task.

Jason posed the question of UT numbers/SIP draft review by ITEP for accuracy. (article link) UT tribes may not be aware of the proposal. UT plants have complications from past litigation etc (Tom description). **Jason sent the article link to them.** We may not know if states (UT) did consultation. **Tom plans to communicate with UT.** Outreach may be relevant to EPA R8 so **Jason plans on asking R8 Tribal Air Branch.** Anyone can make a public comment (tribes w/o TAS).

2. Letter: Rough draft in December. **By next fri T will send it to us.** **Comments back from TDWG members by 2/5.** T will add language generic about opportunities to give feedback to states on their planning process (UT is example). Encourage non active tribes to become more active.
 3. EN3 august (13 pg) report on tribal oil & gas – Tom will shared with WRAP OGWG & Ramboll; the report will then complete Task 1.4. **Cutoff date is 1/31 for OGWG comment/review to EN3/Tom.** Finalize on next call.
